

donors concerned about the changes are discouraged further by the perception of the new burdens associated with the amended rules.

Charities which had operated successful vehicle donation programs, either independently or through third-party fundraisers, have been hit hard. Those unable to cover overhead costs have eliminated vehicle donation programs and resolved to forego the resulting revenue stream. It appears that no charities have initiated or expanded vehicle donation programs over the past two years.

Contrary to reassurances offered during the congressional debate, the tax law changes constituted a classic "baby and bathwater" overreach that has seriously impacted social services provided by non-profit groups across the country. Modest tax incentives are critical to sustaining charitable contributions, including in-kind gifts. The decline in vehicle donations since 2004 could be addressed by minor legislative refinements that would also address potential abuses and buttress IRS enforcement.

Following are the text and technical analysis of my proposed legislation, which I view as a starting point for new congressional debate on this important issue.

CARIBBEAN-AMERICAN HERITAGE MONTH NEED FOR THE UNITED STATES TO FOSTER RELATIONSHIPS WITH CARIBBEAN NATIONS, SUCH AS THE NETHERLANDS ANTILLES, AND SUPPORT EFFORTS TO IMPROVE FINANCIAL AND GEOPOLITICAL STABILITY IN THE REGION

HON. DONALD M. PAYNE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 31, 2008

Mr. PAYNE. Madam Speaker, I rise in support of this Concurrent Resolution recognizing the importance of our Nation's Caribbean heritage and urge its adoption. I would like to take this opportunity, in part, to focus attention on the provisions of H. Con. Res. 364 that highlight the continuing importance of the Caribbean region to our Nation. I believe it is important that the United States work harder to foster our relationships with Caribbean nations and support their efforts to enhance the financial and geopolitical stability of the region. I recently had the opportunity to visit with Dr. Emsley D. Tromp, President of the Bank van de Nederlandse Antillen, the Central Bank for the Netherlands Antilles. During that meeting, we had the opportunity to discuss the growing importance of our relationship with the Netherlands Antilles, which has grown closer, as this country has approached independent status within the Kingdom of the Netherlands. The Netherlands Antilles has endeavored to improve its security through a more diversified economy and favorable environment for additional foreign direct investment, particularly from the United States. The Netherlands Antilles made substantial changes to their tax laws, bringing them into compliance with international norms. In addition, they entered into a tax information exchange agreement (TIEA) with the United States and have actively cooperated on tax enforcement matters. It is an important strategic partner of the United States in the Caribbean Basin with shared in-

terests in countering transnational terrorism and crime and illegal narcotics production. A Forward Operating Location (FOL) on Curacao provides support for our drug interdiction efforts in the region. Madam Speaker, the United States should recognize and support efforts such as these in the Caribbean region, and actively work to forge closer ties with the Caribbean nations.

HONORING THE CENTENNIAL OF THE UNIVERSITY OF CALIFORNIA, DAVIS

HON. MIKE THOMPSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 31, 2008

Mr. THOMPSON of California. Madam Speaker, I rise today, together with Representatives MILLER, M. SPEIER, MATSUI and LUNGREN, to mark the 100th anniversary of the University of California, Davis. In the past 100 years, UC Davis has emerged from an agricultural outpost into one of the world's premier research universities, and along the way it has provided a first-rate education for generations of students, including several of my colleagues here today.

UC Davis touches and transforms everything that matters to us as human beings—our health; the economy; what we eat and drink; the ways we live and work together; how we find meaning through art, music, and literature; and our understanding of the natural world. UC Davis is a leading institution of education and innovation whose impact is felt around the world.

UC Davis was founded as an agricultural extension of the main University of California campus at Berkeley to address a lack of in-state educational opportunities for students of agriculture. Governor George Pardee signed off on the expansion in 1905, and Davisville was quickly selected as the location where the campus opened to 18 students in 1909. Women joined the student body in 1914.

In 1959 the Regents of the University of California elevated UC Davis to a general campus within the University of California system. This allowed the campus to develop as an institution in its own right, growing into new fields and developing its distinctive identity. Today, the campus is the largest in the system at over 5,300 acres and is internationally renowned for its beautiful layout, the extensive bike paths, arboretum and the art that enhances it throughout.

In 1966, the university affiliated with Sacramento County Hospital and within two years the first students were admitted to the UC Davis School of Medicine. The UC Davis Medical Center is consistently recognized as one of the top-50 hospitals in the Nation, and it serves as the region's trauma center. In addition, the hospital's cancer center, children's hospital and M.I.N.D. Institute for neurodevelopmental disorders are leaders in their respective fields.

As a research institution, UC Davis remains the most vibrant and productive agricultural research university in the United States, but it has expanded far beyond these roots. The faculty and administration are committed to providing a rigorous, attentive and research-oriented campus that has created a world-

class learning environment. Each year, the campus welcomes a diverse and talented group of students, and it remains a popular college destination for students from California and beyond—for the 2008 entering class, UC Davis received over 42,000 freshman applications, a 15 percent increase. With a student body of over 30,000, and 178,000 alumni, UC Davis has had a wide-spread impact on life in our state.

In 1996, the university joined the prestigious Association of American Universities, representing the top 62 research universities in North America. Research funding, most of which is competitively awarded, has risen to \$600 million annually, including a remarkable 15 percent jump over the past year. UC Davis's faculty regularly collaborates with leading researchers and scientists around the world. Recently, the university signed a partnership agreement to collaborate with Chilean universities on research in viticulture and enology, a major industry for California. The faculty maintains active research programs in a wide variety of fields with importance to the state and nation, including 1,500 researchers working on a range of environmental issues and over 100 engaged in cutting edge discovery and innovation in the transportation and energy sectors.

The work of the university has long been sustained by generous philanthropy from alumni and others supportive of the university's mission. Donors have established more than 100 endowed chairs at UC Davis. Recent gifts have included \$100 million from the Gordon and Betty Moore Foundation to launch the new Betty Irene Moore School of Nursing; a \$10 million gift from alumnus Maurice Gallagher and his wife Marcia to fund a new building (Maurice J. Gallagher Jr. Hall) and an endowment for the Graduate School of Management; and \$35 million from Margrit Mondavi and the late Robert Mondavi to help establish the Mondavi Center for the Performing Arts and the Robert Mondavi Institute for Wine and Food Science.

Excellence in women's and men's athletics has long been a proud tradition at UC Davis. For its thorough dominance of college athletics at the NCAA Division II level, Davis was awarded the Sears Cup for best Division II athletic program in six of the first eight years the award was given. At the Division II level, UC Davis won multiple national championships including basketball, softball and tennis. In 2003, UC Davis undertook the rigorous process to move its athletic programs to Division I. In 2007, the Aggies gained full Division I status after completing the probationary study-period and they now compete against the finest athletes in the nation. Undoubtedly, the most exciting times in this transition were the series of upset victories over "the other farm" in a variety of sports including football, basketball, soccer, wrestling and baseball.

Madam Speaker, at this time it is appropriate that we recognize and congratulate the University of California, Davis, on the occasion of its centennial. Over the past one hundred years, the university has been of incalculable benefit to the State of California and our nation with its accomplishments across all the fields of human endeavor. As an educational institution, UC Davis is rightly counted among the finest in the country and generations of students have benefited from the wisdom and
